

ContractLens

Commercial Governance Control Room

Turning static contractual commitments into owned operational decisions, deterministic milestones, and financial risk controls.

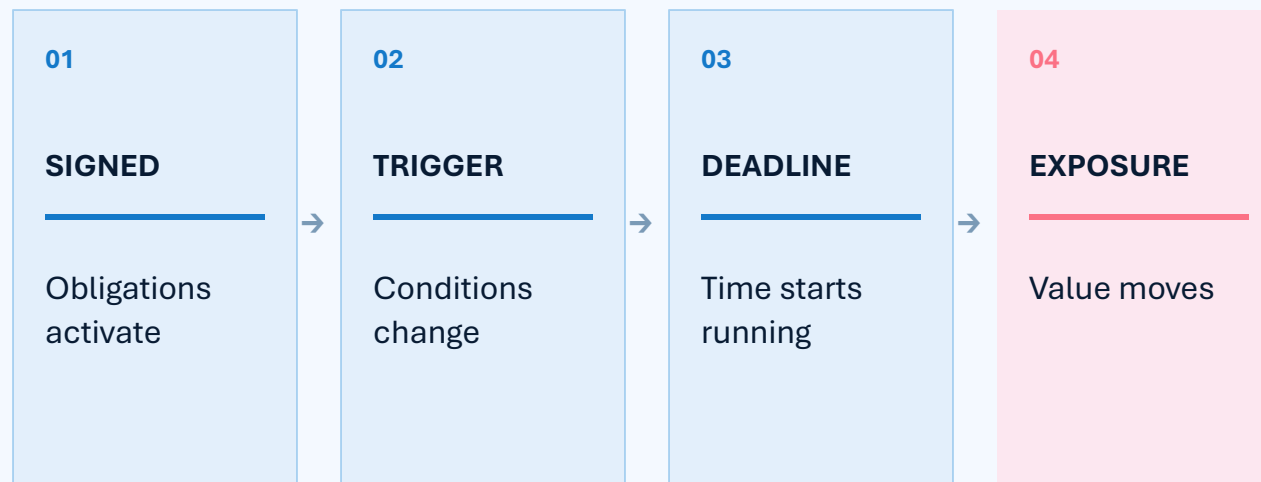

The Case — Contracts Are Operating State Machines

8.6–11%

of contract value is lost through
value erosion and post-signature leakage.

Contracts do not stop mattering when signed.
That is when operational commitments begin.

OPERATIONAL GAP

Operators lack an active state-tracking engine for cross-functional commitments, ownership, and deterministic deadlines.

Target Persona & Stakeholders

PRIMARY OPERATOR

Maya Rao

VP Finance • Head of Operations
Procurement Lead • Sourcing Director

ACCOUNTABILITY WITHOUT LEGAL OVERHEAD

Manages commercial vendor relationships and margins. Holds sign-off accountability, but has no formal legal background.

Outside counsel is too slow and costly for day-to-day commitment tracking.

GOVERNANCE GATE

General Counsel
& Legal Ops

Wants structured escalation slips on material liability and jurisdictional shifts—not routine review of 40-page SOWs.

ESCALATE

Material liability
Jurisdictional shifts
High-consequence decisions

Jobs to Be Done (JTBD)

< 10

MINUTES

From agreement execution to owned commitments, deadlines, and risk shifts.

01 FUNCTIONAL

Extract commitments, deadlines, and asymmetric risk shifts instantly.

03 SOCIAL

Show the Board, CEO, and audit committee proactive control.

02 EMOTIONAL

End the dread of missed auto-renewal cutoffs and deemed-acceptance traps.

04 NEGATIVE

Avoid nine-month CLM deployments and ungrounded legal-advice chatbots.

The Strategic Void — Why Existing Solutions Fail

01

Enterprise CLM

Icertis, Ironclad

- Pre-signature center of gravity
- Complex 6–9 month deployment
- Dedicated legal ops administrators
- Weak operational execution

02

Horizontal AI

“Chat with PDF”

- Stateless vector search
- Hallucinates dates and windows
- No deterministic date math
- No accountability tracking

03

ContractLens

Post-signature governance

- **Deploys instantly**
- **Tracks operating state**
- **Deterministic milestone engine**
- ✓ **100% verifiable grounding**

THE DIFFERENCE

Operational state—not document search.

System Operating Model

LANGUAGE

CONTROLLED DECISION

Agentic AI System Architecture

LLMs interpret meaning.

Code calculates consequences.

SEMANTIC REASONING LAYER

Structural AST Parser Agent

Typed clause trees • character indexing

Obligation & Change Agents

Promises • triggers • risk shifts

Abstention Protocol

Stop when evidence or jurisdiction is uncertain

GOVERNANCE SUPERVISOR AGENT

Audits against raw text • enforces exact substring grounding • routes exceptions to humans

DETERMINISTIC ACTION ENGINE

Python-native date arithmetic

ZERO LLM DATE DRIFT

Calendar dispatches • deadline rules • status transitions

Scope Discipline & Strategic Trade-offs

MUST HAVE — SHIPPED IN BASELINE

- 01 **Executive Overview Command Center**
- 02 **Commitment Register + Evidence Drawers**
- 03 **Deterministic Temporal Engine (.ics)**
- 04 **Version Risk Intelligence**
- 05 **Grounded Copilot**
- 06 **Operational Assurance Console**

EXPLICIT NON-GOALS

NO in-app e-signature

Not competing with signature gateways.

NO heavy Word add-in

Optimize operational outcomes—
not markup workflows.

Product Surface — One Unified Control Room

ONE CONTROL ROOM

Portfolio → agreement →
change → decision →
assurance

Hong Kong

CORE INSIGHT

The counter-draft is where the operating risk moved—not the headline value.

A 7-day deemed-acceptance window and 50% advance payment against Bill of Lading now matter far more than the \$45,000 contract value.

Four Redlines Move the Risk Posture

§3.1	30 business days	→	7 calendar days	Deemed acceptance may trigger while customs consumes 4–6 days.
§2.2	Conventional terms	→	50% advance + 50% at B/L	100% of cash leaves before destination clearance.
§4.2	No buyout	→	+\$12K tooling buyout	Custom bottle molds remain locked until release or buyout.
§5.2	Annual renewal	→	Mandatory 2-year renewal	Miss the 02 Aug 2027 notice and forward spend locks in.

COMBINED EFFECT

Cash out before clearance • quality acceptance by silence • forward spend lock-in

Commitment Register — Operational Ledger

COMMITMENT	OWNER	SOURCE	STATUS	DEADLINE
Issue non-renewal notice	Buyer / Maya Rao	\$5.2	AT RISK	02 Aug 2027
Complete incoming lab clearance	Buyer / Mumbai Quality	\$3.1	ACTION REQUIRED	7 calendar days
Confirm tooling release or buyout	Supplier / Maya Rao	\$4.2	TRACKED	Pre-Execution
Submit Bill of Lading invoice	Supplier / Finance	\$2.2	SCHEDULED	Net 15

Every row binds an owner, trigger, deterministic deadline, source section, and live status.

Evidence drawer available at row level

Evidence Visible at the Point of Action

§3.1 / VERBATIM EVIDENCE

“Silence shall constitute irrevocable deemed acceptance within seven (7) calendar days of arrival at destination port.”

EXACT SOURCE TEXT

ONE CLICK FROM COMMITMENT

94–99%

HIGH AI CONFIDENCE

100%

GROUNDING GUARANTEE

Every assertion anchors to an exact source substring—not a generated summary.

Trade Intelligence— Reads Customs Related Words

30

BUSINESS DAYS

7

CALENDAR DAYS

This is not a word diff.
It is an exposure shift.

OPERATIONAL CONSEQUENCE

A 4–6 day customs cycle leaves almost no time for lab clearance before silence becomes deemed acceptance.

FINANCIAL LEVERAGE

Bill of Lading payment moves cash before destination clearance and weakens dispute leverage.

PLAYBOOK OUTPUT

Every severity level ships with an actionable counter-proposal.

Decision Copilot — Answers Behind the Clause

EXECUTIVE INQUIRIES

- 01 “What can cost us money under the revised terms?”
- 02 “What happens if lab testing takes 8 days?”
- 03 “Which items require human review and legal escalation?”

GROUNDING INTELLIGENCE

Cash leaves before
destination lab clearance.

96%

CONFIDENCE

§§2.2 • 3.1 • 5.2

DIRECT CLAUSE CITATIONS

HUMAN REVIEW GATE

High-consequence actions cannot execute autonomously.

Operational Assurance — Making Trust Measurable

100%

Evidence grounding ratio

All claims anchored to verbatim text

2

Human review gates

Before high-consequence execution

3.4s

Processing latency

Question to grounded answer

₹3.20

Unit execution cost

\$0.038 per governed decision

Governance is a primary product surface—not a footnote.

Live Governance Trace & Close

01	Ingestion complete	Hash verified
02	Grounding checks passed	100% substring match
03	Deterministic date calculation	02 Aug 2027 cutoff
04	HKIAC abstention protocol	Foreign arbitration → legal counsel

CONTROL
STANDARD

REASON

CALCULATE

SUPERVISE

DECIDE

LLMs reason. Deterministic code calculates. Governance supervises. Humans decide.

ContractLens turns agreement language into controlled decisions.
